LEVEL

ASSEMBLY LEVEL 1

Drag chains

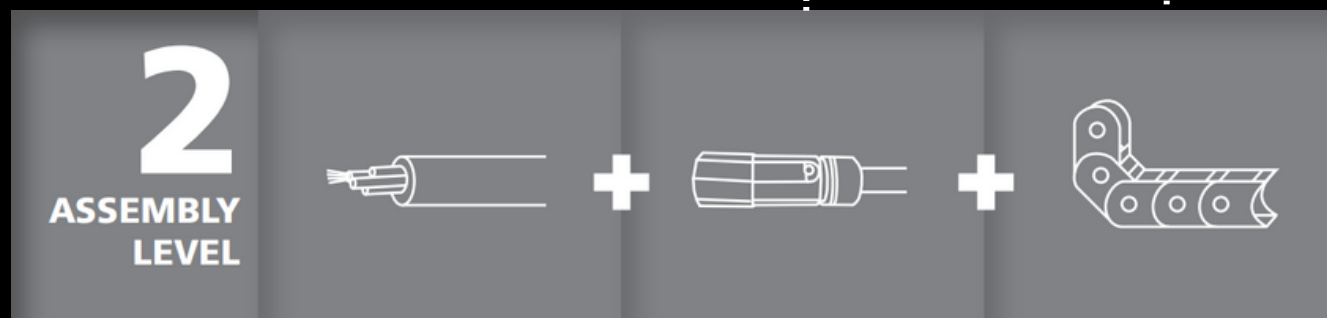

Cables for drag chains

- Standard solution with high compatibility
- Configurable connections
- No extra material or minimum quantity surcharges for cables
- Suited for easy and quick integration in existing machine designs, self-assembly and in-house processing, reduced planning requirements for projects

ASSEMBLY LEVEL 2

Cable assemblies or hydraulic hoses

Drag chains

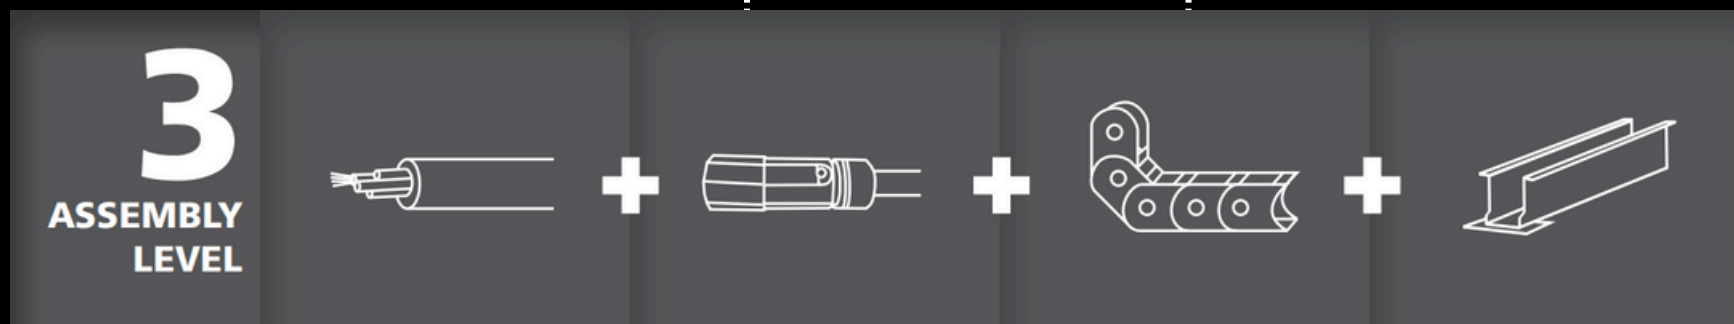

Cables for drag chains

- Individually tailored assembly solution
- 100% tested and plug-and-play ready for your application
- Reduced installation times
- Suited for low production depth in machine manufacturing, use in series and specialty machines, and short installation times with documented quality

ASSEMBLY LEVEL 3

Cable assemblies or hydraulic hoses Drag chains

Cables for
drag chains

Accessories (troughs, floating supports,
support trestles, transport racks)

- System solution for immediate integration
- Ideal for standardised or recurring applications
- Save time and money with simplified installation
- Suited for use in series or specialty machine construction, and systems with the highest efficiency and safety requirements
